

Not just for the heat! Don't put that hot dog up without GoDog in cold weather. Go dog enables your dog to recover quickly by reduce core temperature to prevent tying up. Delicious, instantly mixing GO DOG makes workouts more productive, fun and safe and encourages water consumption (perfect for dogs that won't drink at a trial or show). GO DOG delays fatigue, extends endurance, reduces core temperature & boosts hydration. By boosting physical and mental performance, dogs recuperate quickly and maintain mental clarity and focus. GO DOG reduces Fatigue Related Injury Syndrome to make exercise more fun and safe. GO DOG even supplies the joint breakthrough hyaluronate. NO! sucrose, fructose, trans fat, corn syrup or by products. Mix 1 scoop GoDog powder in 21 oz water and stand back while your dog dives in. Available in 15 oz can, approximately 21 servings. Just add water and go!

All natural GoDog featuring O2Boost, is the first total performance drink for dogs. Every dog benefits from GoDog, not just canine athletes. Whatever the activity, GoDog improves comfort, safety and, of course, performance.

Improve Performance Recreational: fun walks & daily exercise is more comfortable, fun and safe. Extreme: agility, fly-ball, schutzhund, sled and other performance dogs find that elusive extra gear & second wind that defines winners. Show: maintain energy & focus when others fade, increases fluid consumption to prevent dehydration.

Prevent Muscle "Cannibalization" GoDog protects muscle from exercise-induced breakdown and damage. The harder the exercise, the more muscle broken down for energy, and the more damaged. GoDog contains factors proven to protect canine muscle, ensuring exercise is beneficial.

Increase Comfort & Safety Increased oxygen delivery, hydration, and lactic acid clearance make exercise more fun and comfortable. GoDog helps prevent F.R.I.S. (Fatigue Related Injury Syndrome) occurring in tired dogs. Plus, GoDog helps "beat the heat" in hot temperatures to make exercise safer.

Better Recovery GoDog promotes faster, total recuperation. The result is a fresher, fully recovered dog ready to exercise. Complex carbohydrates recharge muscle and liver glycogen. Adaptogens reduce stress hormones, creatine kinase and toxic free radicals speed cellular repair.

Directions: Mix one scoop GoDog in 21 oz water in a shaker or sports bottle. Squirt from sports bottle slowly into dogs mouth or pour into water bowl.

Before exercise - feed 25% of bottle 15 minutes prior to exercise.

During exercise - feed 25% of bottle every 15 - 45 minutes.

After exercise - feed remainder within 30 minutes after workout.

Dog shows, performance trials, etc. - feed 25-50% of bottle every 30-60 minutes to maintain energy levels

GO DOG HUMAN GRADE INGREDIENTS

GODOG Performance Factors™ Glucose polymers (long chain complex carbohydrates), Resistant starch, Medium-chain triglycerides, Beef Fat, Potassium L-lactate, Sodium L-lactate, O2Boost™ L-Citrulline, L-Citrulline Malate, D-Ribose, Potassium ascorbate, L-Carnitine, Magnesium orotate, GODOG Recovery Factors™ Cooked chicken, Cooked beef, L-Glutamine, L-Leucine, L-Valine, L-Isoleucine, L-Taurine, L-Carnosine, ALA (alpha lipoic acid), L-Alanine, L-Glycine, Phosphatidylserine.

GODOG Hydration Factors™ USP Glycerol, Sodium citrate, Potassium citrate, Potassium succinate, GODOG Antioxidant Factors™ Vitamin E (alpha-tocopherol), Calcium ascorbate (non-acidic source of vitamin C), Grape seed extract.

GODOG Joint Factors™ TMG (trimethylglycine), Chondroitin sulfate, MSM (S-Adenosyl Methionine), Sodium hylauronate (glucuronic acid N-acetyl glucosamine), Choline bitartrate, Calcium Lactate, Pyridoxine HCL, Inositol, Di-calcium phosphate, Zinc L-Aspartate, Folic acid, Manganese L-Aspartate, Dimethylprimidinol sulfate (source of vitamin K), Thiamin monohydrate, Cyanocobalamin (B12), Paba.
